

# TAILGATE MULCHER

The Tailgate Mulcher is the leading compact straw blower in the rental and landscaping industries. Save up to 20% in material costs over hand shaking straw, and spread an average of 120 bales per hour with the Tailgate Mulcher.

#### **Experience Fast and Even Results:**

8 hardened beater flail chains pulverize the straw, rather than cut it with knives. The Tailgate Mulcher can handle wet straw, as well as heavier hay materials and will avoid clogging issues experienced with cutting knives.

#### **Fully Rotational Metal Cannon:**

The Tailgate Mulcher features a 360-Degree fully rotational metal cannon that eliminates wear and tear associated with hose. With an available coupling attachment, the user can still attach up to 100' of 6" hose to the Tailgate Mulcher to access hard to reach areas.

#### **Features & Benefits:**

**Metal Discharge Cannon:** Eliminates need for flexible hose

**Triple V-Belt drive:** Eliminates vibration and coupling failure

**Beater Flail Chains:** No knives to replace or sharpen

**Skid or Trailer Mounted:** Can easily be mounted on the back of a truck or towed

#### **TAILGATE MULCHER SPECIFICATIONS**
